

## S-Video to RCA AV Cable

This cable allows connection of devices with an S-Video output to devices with an RCA input. It is commonly used to transmit video signals between DVD players, VCRs, and televisions.

### Product Overview

#### Reliable Video Connectivity

This S-Video to RCA AV cable is designed to bridge the gap between legacy audio-visual equipment. It allows for seamless signal transmission from devices featuring S-Video outputs, such as older DVD players and VCRs, to displays equipped with RCA inputs. Built for clarity and reliability, this cable ensures an optimal viewing experience for your media collection.

### Technical Specifications
