

S195 Diesel Engine Fuel Injection Plunger

This high-precision plunger is designed for S195 diesel engines. It is manufactured from hardened steel for durability and wear resistance.

Product Overview

High-Precision Fuel Injection Component

The S195 Diesel Engine Fuel Injection Plunger is a critical component engineered to ensure optimal fuel delivery and engine performance. Manufactured from hardened steel, this part is built for superior durability and wear resistance in demanding operational environments. It features a meticulously ground surface finish and tight tolerance dimensions to guarantee reliable metering and precise timing for S195 diesel engine fuel systems.

Technical Specifications

Performance Highlights

1 Precision Ground

Surface Finish Quality

Material	Hardened Steel
Compatible Engine Model	S195 Diesel Engine
Key Features	High-Precision, Hardened Steel, Wear Resistant, Tight Tolerances
