

# SAA Approved Power Cord

This power cord is SAA approved for use in Australia. It is suitable for electric appliances requiring the Australian standard.

## Product Overview

### SAA Approved Power Cord

This SAA approved AC power cord is engineered to meet the stringent AS/NZS3112 standards, ensuring safety and reliability for the Australian market. Featuring a durable, flexible design and a molded two-pole plug, it is an ideal power solution for various household electronics and kitchen appliances. With support for multiple current ratings up to 10A and a standard 250V supply, this cord provides a versatile and secure connection for professional equipment applications.
