

Sachet Packing Machine for Irregular Shaped Mud Masks

This packing machine is designed for filling and sealing irregular sachets, particularly for mud mask products. It utilizes a PLC system for automated operation and includes a touchscreen interface for easy control.

Product Overview

Advanced Sachet Packing Solution

This advanced packing machine is specifically engineered for filling and sealing irregular or abnormal shaped sachets, making it an ideal solution for mud mask packaging. Constructed with durable stainless steel to ensure hygiene and longevity, it features a highly precise volumetric filling system. Equipped with a programmable logic controller (PLC) and an intuitive touchscreen interface, it provides automated operation and seamless control over critical sealing parameters for high-volume production.

Technical Specifications

Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
Filling System Type	Volumetric
User Interface	Touchscreen

Key Features

Operational Benefits

- Automated operation via PLC
- Precise sealing parameter control
- Easy adjustment and monitoring
- Hygienic stainless steel design

Best For	Irregular Shaped Sachets, Mud Masks, High-Volume Production
