

Sand Production Line

This production line provides comprehensive technical support for sand creation. It efficiently crushes stone into high-quality sand.

Product Overview

High-Efficiency Sand Production Line

This sand production line is engineered for high-output mineral processing and aggregate manufacturing. It utilizes advanced crushing and screening technology to deliver consistent grain sizes and high-quality sand products suitable for construction and industrial applications. Designed for reliability and durability, this system optimizes material flow while minimizing energy consumption.

Operational Metrics

Production Capacity

500 tph

Output Capacity

Key Features

System Advantages

High Efficiency, Low Energy Consumption, Uniform Particle Shape, Automated Control

System Configuration

Processing Stages

- Primary Crushing
- Secondary Crushing
- Screening and Classification
- Sand Washing and Dewatering

Compliance & Quality

Standards

ISO 9001 • CE Certified
