Product Overview

High-Performance Abrasive Solutions

These abrasive belts are engineered with premium grains bonded to a durable cloth backing using advanced synthetic resin. Utilizing electro-coated technology, the belts deliver superior sharpness and increased working efficiency for demanding sanding tasks. They are versatile tools designed to provide consistent, smooth results across a wide range of industrial and DIY applications.

Technical Specifications

Manufacturing Technology	Electro-coated synthetic resin bonding
Backing Type	Processed cloth backing

Applications

Primary Applications

- Grinding
- Sanding
- Surface Finishing

Compatible Materials	Wood, Ferrous Metals, Non-Ferrous Metals, Steel, Plastic, Rubber
