Product Overview

High-Efficiency Sanding Belts

These professional-grade sanding belts are designed for precision surface preparation, smoothing, and material removal. Featuring specialized dust extraction holes, these belts ensure optimal debris management, resulting in a cleaner work environment and extended product life. Suitable for both woodworking and metalworking applications, they provide durable performance for demanding industrial tasks.

Technical Details

Design Features

- Pre-punched holes for dust extraction
- Durable backing material
- High-quality abrasive grit
- Designed for power sanders

Efficiency Metrics

8 holes

Dust Extraction Holes

Applications

Woodworking, Metalworking, Surface Preparation, Smoothing
