

Sanding Rolls for Surface Preparation

These sanding rolls offer quick heat dissipation and uniform abrasive distribution for effective material removal. Treated for antistatic and anti-clogging properties, they are designed for manual use in automotive and furniture applications with machinery and vibration sanders.

Product Overview

Professional Surface Preparation

These high-quality sanding rolls are engineered for optimal surface preparation in automotive and furniture manufacturing. Designed for consistent abrasive performance, they feature advanced anti-static and anti-clogging properties to ensure longevity. The material is versatile, suitable for both handheld use and integration into machinery or vibration sanders.

Technical Features

Key Features

Anti-static, Anti-clogging, Heat Dissipating, Uniform Sanding, Wear Resisting

Usage Method

Hand use, compatible with vibration sanders and machinery

Applications

Primary Industries

- Automotive industry
- Furniture manufacturing
- Woodworking
- Metalworking

Manufacturing Specifications

Customization Options

- Velcro disc production
- Self-adhesive disc production
