

Sanitary Stainless Steel Reducer Fitting

This stainless steel reducer ensures a smooth, sanitary connection. It is suitable for various applications requiring hygienic conditions.

Product Overview

Professional Sanitary Reducer Fittings

These high-quality stainless steel reducer fittings are engineered for hygienic applications in industrial and food-processing environments. Available in a wide range of sizes and standards, these components ensure reliable and seamless flow transition. The product features superior corrosion resistance and high-grade surface finishing, meeting the rigorous demands of sanitary systems.

Material & Finish

Surface Polishing

- Mirror polish (Ra 0.5-0.8um)
- Semi-polished (Ra 1.6-3.2um)

Material Composition

SUS304, SUS316L

Technical Specifications

Available Connections

- Clamped
- Welded
- Threaded
- Flanged

Industrial Standards

DIN, ISO, IDF, 3A

Size Range (Metric)

DN25 - DN150

Size Range (Imperial)

1" - 6"
