

SATA Interface 160GB Solid State Drive

This high-performance solid-state drive (SSD) uses a SATA interface, providing rapid data access and reliable storage. The 160GB SSD is suitable for computers and other electronic devices, delivering enhanced speed and durability compared to traditional hard disk drives.

Product Overview

High-Performance Storage Solution

This 160GB solid-state drive is engineered to provide reliable and high-speed data access for computing systems. Designed with a standard SATA interface, it offers a durable and efficient upgrade path compared to traditional mechanical hard disk drives. It is an ideal choice for professionals looking to enhance system responsiveness and overall reliability.

Technical Specifications

Capacity	160 GB
Interface	SATA
Part Number	TRUSSSD25160GB-000
Serial Number	MN220202001000

Compliance and Standards

Certifications	CE, FC
