

Satellite Dish Antenna

This satellite dish antenna is designed for receiving or transmitting signals from satellites. It features a parabolic reflector to focus the signal.

Product Overview

Professional Grade Satellite Dish Antenna

This high-performance satellite dish antenna is engineered for reliable signal reception and transmission. Featuring a precision parabolic reflector, it effectively focuses signals for optimal connectivity. The unit is built on a robust metal frame with adjustable elevation and azimuth controls, ensuring precise alignment for demanding professional applications.

Technical Specifications

Structural Components

- Parabolic Reflector
- Sturdy Metal Frame
- Multiple Support Arms

Primary Usage

Signal Reception • Signal Transmission

Reflector Material	Lightweight Aluminum/Steel
Alignment Capabilities	Adjustable Elevation, Adjustable Azimuth
Mounting Base	Circular Stability Base
