

Satellite Dish Antenna

This satellite dish antenna is designed for receiving satellite signals. It features a parabolic reflector, feed arm, and mounting bracket for outdoor installation and signal reception in the Ku band.

Product Overview

Satellite Dish Antenna

This satellite dish antenna is engineered for reliable signal reception in the Ku band, making it an excellent choice for satellite TV and data applications. Featuring a robust parabolic reflector, sturdy feed arm, and a secure mounting bracket, it is built for long-term outdoor performance. The design prioritizes weather resistance and durability to ensure consistent connectivity in various environmental conditions.

Technical Specifications

Frequency Band	Ku band
Applications	Satellite TV, Data Transmission

Construction & Design

Material Quality

Weather Resistant • Durable Construction

Included Components

- Parabolic reflector
- Feed arm
- Mounting bracket

Installation

Mounting	Outdoor installation
