

Satellite Dish Antenna

This satellite dish antenna is designed for receiving television signals. The antenna features a parabolic reflector that focuses radio waves onto a feedhorn to relay signals to a receiver.

Product Overview

Satellite Dish Antenna

This satellite dish antenna is engineered for high-performance reception of television and radio signals. Utilizing a precision parabolic reflector, it effectively concentrates incoming radio waves onto a central feedhorn to ensure signal integrity. The unit is designed with an adjustable pole-mounting system to facilitate accurate alignment for optimal broadcast reception.

Technical Specifications

Design	Parabolic Reflector
Suitable Applications	Satellite TV, Radio Broadcasts

Installation

Mounting Type	Pole-mounted
Alignment Capability	Yes
