

Satellite Dish Antenna

This satellite dish antenna is designed to receive television signals. It uses a parabolic reflector to focus signals onto a feedhorn.

Product Overview

Professional Satellite Reception

This satellite dish antenna is engineered for reliable television signal reception, utilizing a precision-designed parabolic reflector to focus incoming signals effectively. Equipped with a dedicated feedhorn and a robust mounting bracket, it ensures stable and secure outdoor installation. Designed for durability and performance, this unit provides a clear and consistent signal for professional broadcasting needs.

Technical Specifications

Usage Environment

Outdoor

Included Components

- Parabolic reflector
- Feedhorn
- Mounting bracket

Primary Function

Television signal reception
