

Satellite Dish Antenna

This satellite dish antenna is designed to receive satellite signals. It uses a parabolic reflector to focus signals and has an adjustable mounting bracket.

Overview

Satellite Dish Antenna

This satellite dish antenna is engineered for reliable satellite signal reception, suitable for both television and data applications. Featuring a high-performance parabolic reflector, it ensures precise signal focusing and clarity. The unit is built with durable, weather-resistant materials, making it an ideal choice for robust outdoor installations.

Technical Specifications

Construction Features

- Parabolic reflector for signal focusing
- Adjustable mounting bracket for precise alignment
- Feed horn assembly included
- Weather-resistant materials

Installation

Outdoor Rated

Primary Application

Satellite TV, Data Reception
