

Satellite Dish Antenna

This satellite dish antenna utilizes a parabolic reflector to focus signals. It is constructed with weather-resistant material and includes a mounting bracket.

Product Overview

High-Performance Satellite Dish Antenna

This satellite dish antenna features a precision-engineered parabolic reflector design optimized for superior signal focusing and reception. Built to withstand harsh outdoor environments, the unit is constructed from durable, weather-resistant materials ensuring longevity and consistent performance. It comes equipped with a versatile mounting bracket, allowing for secure and stable installation on both walls and poles for television or data transmission applications.

Technical Specifications

Primary Application	Television Reception, Data Transmission
Design	Parabolic Reflector

Physical Properties

Mounting Capability

- Wall Mount
- Pole Mount

Weather Resistance	Yes
