

Satellite TV Receiver DH 105

The DH 105 is a satellite TV receiver. It is designed for communication and signal processing.

Overview

Satellite TV Receiver DH 105

The DH 105 is a professional-grade satellite TV receiver designed for reliable signal processing and high-performance communication. Engineered for stability and clarity, this hardware component ensures consistent broadcast reception in demanding environments. It serves as a robust solution for B2B applications requiring precise signal management and efficient data transmission.

Technical Specifications

Hardware Features

- Integrated Tuner Module
- Advanced Signal Decoding
- Thermal Management System
- Shielded Circuitry

Performance Metrics

105

Model Series

95 %

Signal Stability

Signal Processing

High-Definition, Digital Signal Processing, Low Latency, Error Correction

Compliance and Standards

Certifications

CE • RoHS • ISO 9001
