

# Saw Blade Sharpener

This saw blade sharpener accurately positions and grinds both cemented carbide and white steel blades at high speed. It features automatic tooth dialing and knot-free speed adjustment.

## Product Overview

### Precision Saw Blade Sharpening

The Q12 is a patented, high-performance gear grinding machine engineered for the maintenance of cemented carbide and white steel saw blades. Designed for industrial efficiency, it provides accurate positioning and high-speed compound grinding to ensure optimal cutting performance. With automated tooth indexing and stepless speed regulation, this machine offers the precision and reliability required for professional woodworking and metalworking facilities.

## Technical Specifications

### Automated Functions

- Automatic tooth indexing
- Stepless speed adjustment
- High-speed compound grinding

### Compatible Blade Materials

Cemented Carbide, White Steel

## Key Features

### Safety Features

Protective Enclosure • Emergency Stop

### Operational Highlights

**1 Level**

Patented Design
