

SC Rechargeable NiCd Battery 1.2V 1300mAh

This rechargeable Nickel-Cadmium (NiCd) battery has an SC size, a capacity of 1300mAh, and a voltage of 1.2V. It is designed for various electronic applications needing rechargeable power sources.

Product Overview

Reliable Rechargeable Power

This SC size Nickel-Cadmium (NiCd) battery is engineered for high-drain applications, offering a robust 1300mAh capacity at 1.2V. Designed for durability, it supports over 1,000 charge/discharge cycles and maintains excellent performance even under continuous overcharge conditions. Its consistent reliability makes it an ideal choice for power tools, emergency lighting, and various telecommunications equipment.

Technical Specifications

Chemistry	Nickel-Cadmium (NiCd)
Size	SC
Capacity	1300 mAh
Voltage	1.2 V

Performance Metrics

Cycle Life

1000 cycles

Charge/Discharge Cycles

Self-Discharge Rate	Approx. 79% capacity remaining after 1 month storage at 20±5°C
Overcharge Performance	0.1C rate for 48 hours without leakage or deformation

Applications

Suitable Applications	Power Tools, Emergency Lighting, Telecommunications, Audio Devices, Video Devices, Remote Control Toys
