Product Overview

Heavy-Duty Scaffolding Solution

This scaffolding caster wheel is engineered for superior mobility and stability in demanding construction and industrial environments. It features a robust steel frame paired with a durable polyurethane tire, ensuring smooth movement across various surfaces. Equipped with a reliable locking mechanism and an adjustable stem, it offers both security and leveling capabilities for scaffolding structures.

Technical Specifications

Load Capacity Range

160 mm

Minimum Diameter

200 mm

Maximum Diameter

Key Functionality

- Integrated locking mechanism
- Adjustable leveling stem
- Heavy-duty industrial construction
- High-mobility swivel design

Material Composition

Steel Frame, Polyurethane Tire

Application

Recommended Applications

Construction Sites • Industrial Maintenance • Mobile Scaffolding
