

Schuko Power Socket with Dual USB Charging Ports

This Schuko power socket features two integrated USB ports for charging devices. It provides a 3.1A output and is rated for 16A, suitable for standard power connections.

Product Overview

Modular system designed for flexible combination and easy inventory management.

Integrated Power & USB Charging

This Schuko power socket combines a standard 16A electrical outlet with dual USB charging ports providing a 3.1A total output. Designed for convenience and safety, it features a child-proof shutter and fire-resistant polycarbonate housing. The modular S81 series design allows for versatile installations and seamless integration into residential or commercial interior finishes.

Electrical Specifications

Electrical Parameters

250 V

Voltage

16 A

Socket Current

3.1 A

USB Output

Mechanical & Design

Material Composition

- Polycarbonate (PC) Centre Plate
- Polycarbonate (PC) Casing
- Fire-resistant housing (850°C)

Design Features

Modular Design, Glossy Finish, Child-proof Shutter, Screw Terminals

Compatibility & Installation

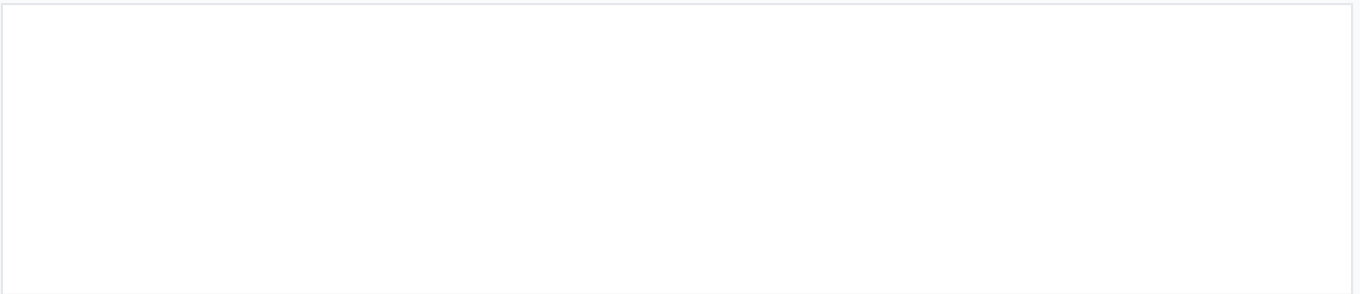

Precise mounting dimensions for standard and rectangular configurations.

Installation Parameters

Parameter	Specification
Fixing Mode	Screws and claws
Clamping Capacity	1.5 - 2.5 mm ²
Temperature (Storage)	-20 to 60 °C
Temperature (Operation)	-5 to 40 °C

Safety & Protection

Engineered for safety with fire-resistant materials and child-proof shutters.

Protection Systems

Short-circuit Protection • Battery Charge Protection • Overload Protection • Thermal Protection
