

# Scored Abrasive Rolls for Sanding and Polishing

Abrasive scored rolls facilitate efficient material removal and surface preparation. The scored design ensures consistent abrasive performance and minimizes waste during sanding, grinding, and polishing.

## Product Overview

### Professional Abrasive Solutions

These scored abrasive rolls are engineered for efficient material removal and high-quality surface preparation. Featuring abrasive grains bonded to a flexible backing, the material is precision-scored at regular intervals to facilitate easy, waste-free tearing and dispensing. They are an ideal choice for sanding, grinding, and polishing tasks across a diverse range of materials, including wood, metal, and plastic.

## Technical Specifications

### Compatible Materials

- Metal
- Wood
- Plastic

### Design Features

Scored for Easy Tearing • Flexible Backing • Waste Reduction Design

### Suitable Applications

Sanding, Grinding, Polishing, Surface Preparation
