

Scourer Pad Production Machine

This machine is engineered for the efficient production of scourer pads. It features automated material handling and a control panel for adjusting process parameters.

Overview

Industrial Scourer Pad Production Solution

This industrial-grade scourer pad making machine is engineered for the high-volume manufacturing of abrasive cleaning pads. Featuring a robust blue and black frame, it integrates a precise vertical actuator and an efficient horizontal feeding mechanism for fully automated material handling. Designed with mobility and process control in mind, the system allows operators to easily adjust production parameters via a centralized control panel.

Capabilities

Output Versatility

- Checkered design pads
- Solid colored metallic pads
- Multi-colored abrasive scrubbers

Material Compatibility

Metallic filaments, Synthetic abrasive materials, Multi-material filaments

Engineering

Frame Construction

Robust blue and black heavy-duty metal frame

Mobility Features

Yes

Actuation Mechanism

Integrated vertical actuator with automated horizontal feeding
