Product Overview

High-Performance Wire Straightening

This scrap wire straightening machine is engineered for professional industrial recycling and metal processing environments. It features a robust, heavy-duty frame equipped with multiple high-precision rollers to ensure consistent straightening of scrap wire. Designed for operational efficiency, the unit includes an integrated motor and adjustable controls to handle various wire gauges and material types.

Technical Specifications

Straightening Diameter	25 mm
Speed of working	28 m/min
Motor Power	15 kw
Cutting Space	500-6000mm

Physical Dimensions

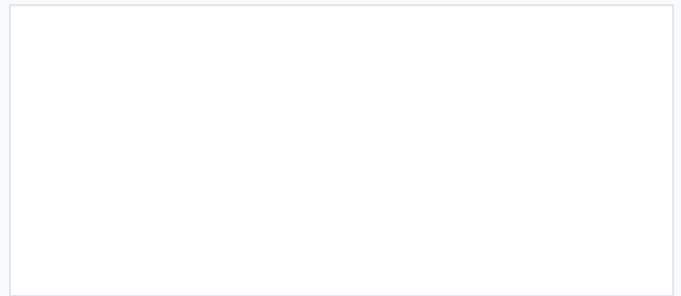

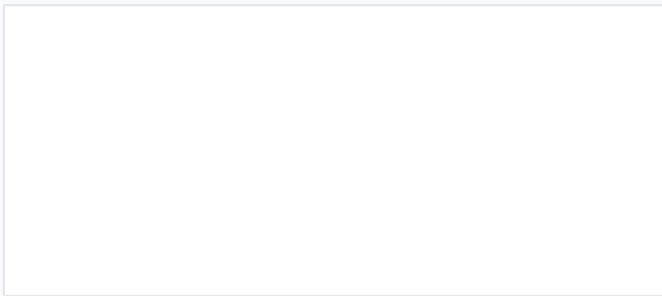

Net Weight

940 kg

Packaging Dimensions

1250 x 800 x 1400 mm

Safety and Features

Operational Features

Wheeled base for mobility, Adjustable rollers, Emergency stop buttons, Protective safety guards, Heavy-duty industrial construction
