

Screw Pin Chain Shackle US Type

This US Type screw pin chain shackle is a robust and versatile lifting component. Constructed from high-strength steel, this shackle features a screw pin mechanism for secure and reliable connections.

Product Overview

US Type Screw Pin Chain Shackle

The US Type Screw Pin Chain Shackle (Model G-210) is a robust and versatile rigging component engineered for secure lifting and material handling. Designed for durability in demanding agricultural and construction environments, it serves as a reliable, detachable link between lifting devices, chains, and slings. This high-strength steel shackle ensures safe operations with its easy-to-use screw pin mechanism.

Technical Details

Model Number	G-210
Export Markets	Global
Component Type	Screw Pin Chain Shackle
