

Screw Tap Grinding Machine PG-Y5

This screw tap grinding machine offers high precision for sharpening taps. Its flexibility extends to machine size, operation, machining performance, and device setup.

Product Overview

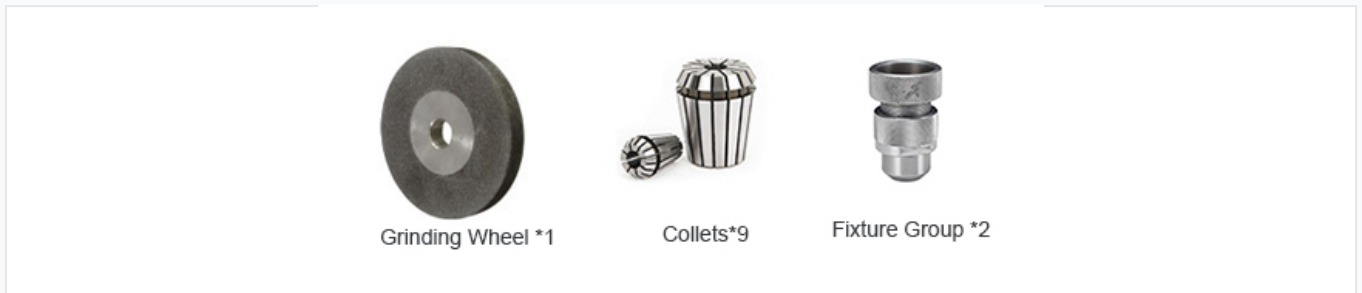

The PG-Y5 grinding unit designed for workshop integration.

High-Precision Screw Tap Grinding

The PG-Y5 is a specialized, high-precision screw tap grinding machine designed to enhance machining efficiency and reduce long-term tooling expenses. Featuring a robust, electrically controlled DC motor, it provides stable power and consistent performance. This versatile, portable unit is engineered for easy operation and accurate maintenance of various screw tap flute configurations.

Technical Specifications

Included standard equipment: Grinding wheel, collets, and fixture groups.

Power and Electrical

220 V
Voltage

250 W
Power Rating

Model	PG-Y5
Compatible Tap Diameter	M16-M42

Capabilities

Precision-ground tap sample processed by the machine.

Supported Flute Counts

- 2-flute
- 3-flute
- 4-flute
- 5-flute (Optional)

Core Advantages

High-Precision Grinding, DC Motor Drive, Portable Design, Reusable Diamond Wheel
