

Screwless Terminal Block

This screwless terminal block features plastic PA66 UL94V-0 parts, stainless steel shrapnel, and brass tin weld legs. It is designed for secure and efficient wire termination.

Product Overview

High-Efficiency Screwless Terminal Block

This screwless terminal block features an advanced push-in connection mechanism designed for rapid, secure, and maintenance-free wire termination. Engineered for industrial reliability, it ensures stable electrical performance in control panels and automation systems. With a versatile pole configuration and wide operating temperature range, it provides a flexible solution for diverse electronic applications.

Technical Specifications

Electrical Performance

2 A

Rated Current

150 V

Rated Voltage

5000 M Ω

Insulation Impedance

Mechanical Details

Feature	Specification
Spacing	2.54mm
Pole Number	2P-30P
Wire Range	20-26AWG
Withstand Voltage	AC 2000V/1Min

Environmental

Operating Temperature

-33°C to +120°C

General

Series ID

JK141V-254
