

Scutch Hammer with Fiberglass Handle

This scutch hammer is equipped with a plastic-coated fiberglass handle for enhanced durability and a comfortable grip. It is designed for efficient and precise performance in various demolition and shaping applications.

Product Overview

Professional Scutch Hammer

This scutch hammer is engineered for durability and precise performance in professional masonry, demolition, and shaping tasks. It features a high-strength fiberglass handle with a plastic coating to ensure a comfortable grip and reduced vibration during extended use. Designed to meet the rigors of heavy-duty environments, this tool delivers the efficiency and reliability required by trade professionals.

Technical Specifications

Key Performance Features

- High-durability fiberglass construction
- Ergonomic plastic-coated grip
- Balanced head-to-handle weighting
- Impact-resistant design

Handle Material	Fiberglass with plastic coating
Primary Applications	Demolition, Masonry, Material Shaping
