

SDS Max Multi-Cutter Hammer Drill Bit

This hammer drill bit is designed with a multi-cutter head. It is suitable for drilling applications in concrete, reinforced concrete, and masonry.

Product Overview

Professional Multi-Cutter Performance

This high-performance hammer drill bit is engineered for demanding applications in masonry, concrete, marble, and granite. Featuring an advanced multi-cutter head design, it ensures efficient material removal while significantly reducing vibration during operation. The robust shank system is designed to deliver maximum drilling torque and hammering energy, providing faster, more consistent results for professional construction and demolition tasks.

Technical Specifications

Key Performance Features

- Multi-cutter head design
- High-efficiency material removal
- Reduced vibration operation
- Maximum torque transmission

Application Suitability

Construction • Demolition • Heavy-duty drilling

Compatible Materials

Concrete, Reinforced Concrete, Masonry, Marble, Granite

Shank Type

SDS Max
