

SDS-Plus Threaded Arbor Adapters

These adapters enable the use of core drills and other threaded tools with SDS-Plus rotary hammer drills. Featuring a robust construction, they ensure secure attachment and efficient power transfer in demanding drilling tasks.

Product Overview

Versatile SDS-Plus Compatibility

These SDS-Plus to Threaded Arbor Adapters are essential tools designed to bridge the gap between standard rotary hammer drills and specialized threaded core drills. Engineered for demanding drilling environments, they ensure a secure, stable attachment that maximizes power transfer during operation. With robust construction, these adapters provide the reliability needed for professional-grade drilling applications.

Technical Specifications

Construction

Robust Steel • High-Torque Compatible

Compatible Tools

- Core Drills
- Threaded Hole Saws
- Rotary Hammer Drills

Shank Type

SDS-Plus

Available Model Numbers

FD-ADA1, FD-ADA2
