

Sealed Lead-Acid Battery

These sealed lead-acid batteries are suitable for applications such as uninterruptible power supplies, emergency lighting, and security systems. The batteries feature a maintenance-free design, a high discharge rate capability, and a long service life.

Product Overview

Professional Sealed Lead-Acid Battery Solutions

This range of maintenance-free sealed lead-acid batteries is engineered for reliability in critical applications. Designed to handle high discharge rates, these units provide dependable power for systems where uptime is essential. Their versatile construction makes them suitable for various industrial and commercial installations.

Primary Applications

UPS Systems, Emergency Lighting, Security Systems

Key Features

Key Performance Attributes

- Maintenance-free design
- High discharge rate capability
- Extended operational service life
