

Sealed Lead-Acid Battery for UPS and Emergency Systems

These sealed lead-acid batteries are designed for various power applications, ensuring dependable power storage. They are suitable for uninterruptible power supplies (UPS), emergency lighting, and other critical systems.

Product Overview

Reliable Power Storage Solution

These high-performance sealed lead-acid batteries are engineered for critical power applications, including uninterruptible power supplies (UPS) and emergency lighting systems. Designed for longevity and reliability, they feature a maintenance-free construction that ensures consistent performance without the need for regular upkeep. With high discharge capabilities, these batteries are built to meet the demanding power requirements of essential infrastructure.

Key Features

Maintenance

Maintenance-free

Suitable Applications

UPS, Emergency Lighting, Critical Systems

Performance Metrics

Performance Highlights

- High discharge capabilities
- Long service life
- Reliable power storage
