

Sealed Nickel-Cadmium Rechargeable Battery Cell

Sealed Nickel-Cadmium rechargeable cells provide reliable power for various applications. Available in cylindrical and prismatic formats, these cells are a cost-effective solution for rechargeable power needs.

Product Overview

Professional Grade Ni-Cd Cells

These sealed Nickel-Cadmium rechargeable battery cells are engineered for high-performance applications including power tools, emergency lighting, and portable electronics. Designed for durability and longevity, they provide reliable discharge characteristics and a sustained cycle life in demanding environments. This versatile series is available in both cylindrical and prismatic formats, offering a cost-effective power solution for industrial and commercial requirements.

Technical Specifications

Available Capacities

- 1300 mAh (AA)
- 1600 mAh (AAA)
- 1700 mAh (AAA/4/5A)

Nominal Voltage	1.2 V
Chemistry	Nickel-Cadmium (Ni-Cd)
Form Factors	Cylindrical, Prismatic

Performance Metrics

Core Metrics

1.2 V Nominal Voltage	1700 mAh Max Capacity
