

Sealing Washers

These sealing washers are precision-engineered for industrial applications. The washers are manufactured from high-quality elastomers and provide resistance to oil, aging, heat, wear, chemicals, and corrosion.

Product Overview

Industrial Sealing Solutions

These high-performance sealing washers are precision-engineered to provide reliable, leak-proof performance in demanding hydraulic and pneumatic systems. Constructed from a wide variety of advanced elastomers, they offer exceptional resistance to oils, heat, aging, and chemical corrosion. Designed for versatility, they are suitable for use across diverse sectors including automotive, industrial, and medical applications.

Material & Properties

Performance Characteristics

Oil Proof • Aging Resistant • Heat Resistant • Wear Resistant • Chemical Resistant • Anti-corrosion

Supported Materials

NBR, NR, HNBR, MVQ, ACM, FLS, CR, SBR, SI, BR, IR, EPDM, IIR, PU, ECO, CSM, VITON, FKM, FPM

Hardness (Shore A)

30 shore A

Compliance & Quality

Manufacturing Standards

- ISO9001:2008
- TS16949

Material Approvals

RoHS, REACH, PAHS, PFOS, PFOA, FDA, NSF, KTW, WRAS, LFGB

Operations

Production Lead Time

1 weeks

Min Lead Time

2 weeks

Max Lead Time

Order Policy

Small order quantities are welcomed.
