

Seamless Steel Pipe for Oil and Gas Applications

This seamless steel pipe is engineered for oil and gas extraction and production. It features robust construction and precise dimensions.

Overview

Professional Oil & Gas Tubular Solutions

These seamless steel pipes are engineered for demanding oil and gas applications, including drilling and extraction. The product line encompasses a comprehensive range of tubular goods, such as drill pipes, drill collars, and coupling solutions. Designed to meet rigorous industry standards, these pipes provide the durability and precision required for energy sector operations.

Technical Specifications

Available Material Grades

- J-55
- K-55
- N-80
- L-80
- L80-9Cr
- L80-13Cr
- P110
- Q125
- X70
- X80
- S135
- G105

Outer Diameter Range

60.325 mm

Min OD

254 mm

Max OD

API Standards

API 5L, API 5CT, API 5DP, API SPEC 7-1

Product Types

Product Categories

Drill Pipe • Drill Collar • Heavy Drill Pipe • Coupling • Perforating Gun Barrels • API Tube
