

Security Safe with Key Lock

This security safe is designed for storing documents and valuables securely. It features sturdy construction, a keyed locking mechanism, and internal shelving for organization.

Overview

Professional Security Solution

This security safe provides a robust storage solution for high-value documents and personal items. With a heavy-duty design featuring a 15mm thick door and a 55mm thick body, it is engineered for maximum protection against theft. The interior is optimized for organization, making it an ideal choice for maintaining security in both professional office environments and private residences.
