

Seed and Nut Oil Press

This industrial screw oil press is designed for extracting oil from seeds and nuts. It features a hopper for feeding raw materials, a pressing chamber, and collection containers for the extracted oil.

Product Overview

Industrial Efficiency for Oil Extraction

This industrial screw oil press is engineered for reliable extraction of oils from a variety of seeds and nuts. Designed for small to medium-scale production, it features an integrated hopper system for continuous material feeding and a dedicated pressing chamber. The unit is managed via a professional control panel, allowing operators to monitor performance and fine-tune pressing parameters for optimal yield.

Technical Specifications

Key Components

- Material Feed Hopper
- Screw Pressing Chamber
- Oil Collection Containers
- Performance Control Panel

System Features

Adjustable Parameters • Performance Monitoring • Industrial Build

Application

Small-scale production, Medium-scale production, Nut processing, Seed processing
