

Segmented Blade Utility Knife

This is a metal retractable utility knife with a segmented blade. It features a thumbwheel for extending and retracting the blade.

Product Overview

Professional Segmented Utility Knife

This durable, metal-bodied utility knife is engineered for precision cutting tasks across various materials including cardboard, paper, and plastic. It features a convenient segmented blade design that allows users to easily snap off dull sections to maintain a sharp edge. With its ergonomic grip and reliable thumbwheel mechanism, this tool is designed for consistent performance in professional environments.
