

Segmented Diamond Cup Grinding Wheel

This diamond cup grinding wheel is designed for concrete grinding and surface preparation. It features a segmented rim for efficient material removal and aggressive grinding action.

Product Overview

Professional Grade Grinding Performance

This segmented diamond cup grinding wheel is engineered for efficient concrete grinding and surface preparation. Featuring a robust segmented rim design, it delivers aggressive material removal, making it ideal for leveling uneven surfaces, stripping coatings, and prepping concrete for final polishing. Its durable construction ensures consistent results across various applications, including floors, walls, and countertops.

Technical Specifications

Size and Configuration Table

Outer Diameter	Arbor Size	Segment Count
5" (125mm)	7/8" (22.23mm)	8
7" (180mm)	7/8" (22.23mm)	12

Segment Dimension	36 x 24 x 5.2 mm
-------------------	------------------

Compatibility & Usage

Primary Applications	Concrete Grinding, Surface Preparation, Coating Removal, Leveling, Floor Polishing Prep
Tool Compatibility	Compatible with most standard angle grinders
