

# Segmented Diamond Saw Blade

This diamond cutting blade is designed for precision cutting of hard materials. It features a segmented rim for efficient debris removal and cooling, ensuring a longer blade life and smoother cuts.

## Product Overview

### High-Performance Cutting Solution

This segmented diamond saw blade is engineered for precision cutting of hard construction materials. Its specialized segmented rim design facilitates efficient debris removal and enhances cooling, which significantly extends the blade's operational lifespan while ensuring smoother, cleaner cuts. The blade is versatile enough to handle concrete, stone, tile, and various masonry applications with ease.

## Technical Specifications

### Cutting Modes

Wet Cutting • Dry Cutting

### Design Features

- Segmented rim for debris removal
- Enhanced cooling system
- Extended blade life
- Precision cutting capability

### Suitable Materials

Concrete, Stone, Tile, Masonry
