Product Overview

Professional Segmented Diamond Blades

These high-quality diamond saw blades feature a segmented rim design engineered for efficient material removal and rapid heat dissipation during operation. Available in multiple sizes, they are ideal for cutting through challenging construction materials including masonry, concrete, granite, and marble. Designed for versatility and durability, these blades deliver clean, precise cuts for both professional construction projects and demanding DIY applications.

Technical Specifications

Available Sizes & Dimensions

Diameter	Bore/Arbor Size
230mm	N/A
115mm (4-1/2")	22.23mm

Compatible Materials

Masonry, Concrete, Granite, Marble, Metal

Safety & Usage

Safety Instructions

- Always wear eye protection during use
- Must be used with a proper safety guard
- Inspect the blade for damage before every use
- Follow all safety recommendations for circular saws to prevent injury
