

Segmented Diamond Saw Blade

This blade's 10mm segments extend cutting life. Small core holes enhance cooling and reduce noise.

Product Overview

High-Performance Segmented Diamond Blade

This high-performance segmented diamond blade is engineered for efficient and precise cutting across a variety of hard materials, including concrete, stone, and masonry. Featuring laser-welded segments with a high concentration of industrial-grade diamonds, the blade offers extended durability and optimal cutting speed. The segmented design facilitates efficient debris removal and cooling, which reduces heat buildup and helps prevent blade warping during heavy-duty tasks. It is suitable for both wet and dry cutting applications, making it a versatile choice for professional contractors.

Technical Specifications

Available Diameters

- 105mm
- 115mm
- 125mm
- 150mm
- 180mm
- 200mm
- 230mm
- 250mm

Cutting Method

Wet Cutting • Dry Cutting

Suitable Materials

Granite, Marble, Roofing Tiles, Concrete, Building Materials
