

# Segmented Diamond Saw Blade

This diamond blade is designed for cutting concrete, masonry, and other hard materials. It features a durable steel core and diamond segments for fast cuts and extended blade life.

## Product Overview

### High-Performance Cutting Solution

This segmented diamond saw blade is engineered for demanding tasks involving concrete, masonry, and other hard materials. Featuring a reinforced steel core and premium diamond segments, it is built to provide rapid, clean cuts while significantly extending tool longevity. The design focuses on optimizing cutting efficiency while minimizing vibration for smoother operation.

## Technical Specifications

Diameter	110 mm
Maximum Speed	5000 R/MIN
Max Peripheral Speed	80 m/s

## Compatibility & Usage

### Suitable Materials

- Concrete
- Masonry
- Hard materials

### Compatible Tools

Angle Grinders, Circular Saws

## Compliance

### Safety Standards

Compliant
