

Segmented Diamond Saw Blade for Stone Cutting

This segmented diamond saw blade is designed for cutting through hard materials such as stone, concrete, and tile. It features a steel core with diamond-impregnated segments brazed to the outer edge for efficient material removal.

Product Overview

Professional Stone Cutting Solution

This segmented diamond saw blade is engineered for high-performance cutting across demanding materials including stone, concrete, and tile. Featuring a robust steel core with precision-brazed diamond-impregnated segments, it delivers superior cutting action and durability. The segmented design facilitates optimal cooling and efficient debris removal, ensuring reduced vibration and an extended service life for both wet and dry cutting applications.

Technical Specifications

Cutting Method

Wet Cutting • Dry Cutting

Suitable Materials

Stone, Concrete, Tile

Design Features

Key Features

- Diamond-impregnated segments for high durability
- Brazed segment construction
- Segmented gaps for debris removal
- Steel core for structural stability
- Universal central bore mounting
