

Segmented Dimming LED Bulb

This LED bulb offers a 3-step dimming function, cycling through 'Brightest', 'Brighter', and 'Bright' settings with each power cycle. It is designed for energy efficiency and long-lasting performance, making it suitable for various lighting applications.

Overview

Segmented Dimming LED Bulb

This advanced LED bulb features a unique 3-step dimming function, allowing for flexible brightness adjustment between 15% and 100% using any standard light switch. Engineered with a low-ripple IC driver to prevent flickering, it provides a stable and comfortable lighting environment. With its elegant ballet skirt design, this bulb combines aesthetic appeal with energy-efficient performance, making it an ideal choice for homes, offices, restaurants, and hotels.

Technical Specifications

Technical Data

Feature	Specification
Item No.	L-BL-0801
Shape	A60
Voltage	100-240V
Beam Angle	200°
Power Factor	0.5
CRI	e80
Dimming Type	3-Step Dimming
Available Color Temperatures	3000K, 4000K, 6500K
Base Types	E27, B22
Dimensions (†L)	60*111mm

Features

Key Features

- 15-100% flexible brightness control
- Non-flickering low ripple IC driver
- Compatible with standard switches
- Energy-saving design
- CE compliant

Recommended Applications

Home • Office • Restaurant • Hotel
