

Segmented Rim Diamond Grinding Wheel

This abrasive grinding wheel is designed for cutting through hard materials like concrete and stone. It features a segmented rim for efficient debris removal and reduced heat buildup.

Product Overview

High-Performance Diamond Grinding Wheel

This segmented rim diamond grinding wheel is engineered for superior performance when cutting through challenging materials such as concrete, stone, and masonry. The segmented design facilitates efficient debris removal and significantly reduces heat buildup during operation. Designed for compatibility with angle grinders and circular saws, it delivers precise, clean cuts with minimal vibration, making it an essential tool for professional construction projects.

Technical Specifications

Diameter	16 inch
Rim Design	Segmented
Tool Compatibility	Angle Grinders, Circular Saws

Key Features

Benefits

- Efficient debris removal
- Reduced heat buildup
- Minimal vibration
- Precise cutting performance

Suitable Materials

Concrete • Stone • Masonry
