Product Overview

High-Performance Self-Bonding Insulation

This high-voltage self-bonding rubber insulation tape is engineered for reliable electrical insulation and protection in demanding environments, including underwater applications. It offers excellent self-adhesive properties for secure application on electrical connections, splices, and repairs. Designed for professional use, this tape ensures long-lasting performance and adheres to strict quality and safety standards.

Technical Specifications

Voltage Rating

10 KV

Maximum Voltage

Dimensions

Property	Value
Thickness	0.8 mm
Width	25 mm
Length	5 y

Compliance & Standards

Certifications & Standards

ISO 9001, Q/0205HJS001-2014, RoHS

Product Features

Key Features

- Self-bonding rubber material
- Suitable for underwater applications
- Lead-free composition
- High-voltage resistance
- Easy and secure application
