

Self-Adjusting Ferrules Crimping Pliers

These self-adjusting crimping pliers are designed for crimping ferrules. The tool features a square crimp profile and is suitable for wire sizes from 0.25 to 6mm² (AWG 23-10).

Product Overview

Professional Self-Adjusting Ferrules Crimping Pliers

The HSC8 6-6 series represents a high-efficiency solution for terminal crimping, engineered with human-centric ergonomics for professional electrical applications. Its self-adjusting mechanism ensures consistent, high-quality pressure across all six sides of the crimping terminal. With a compact weight of only 360g and a length of 175mm, this tool minimizes operator fatigue during repetitive wiring tasks.

Features

Product Highlights

- Self-adjusting mechanism to terminal diameter
- Uniform gripping force application
- Ergonomic design for reduced effort
- Compact and lightweight for portability
