

Self-Adjusting Insulated Anchor Clamp for LV ABC Cables

This self-adjusting insulated anchor clamp is designed for LV ABC cables. It securely anchors aerial bundled cables to poles or walls, providing reliable electrical connections and mechanical support in overhead distribution networks.

Product Overview

Self-Adjusting Anchor Clamp for LV ABC

This self-adjusting insulated anchor clamp is specifically designed for Low Voltage Aerial Bundled Conductor (LV ABC) cables. It features a robust, tool-free installation design that ensures high mechanical stability while protecting the cable sheath. Built with high-strength materials, it offers superior resistance to climatic conditions, making it an ideal solution for reliable overhead distribution networks.

Technical Specifications

Compliance Standards

NFC 33-041

Construction Materials

High strength aluminium alloy, Nylon plus fiber glass, Stainless steel

Key Features

Installation Features

- Tool-free installation
- Self-adjusting mechanism
- Double insulation of the neutral core
- Cable sheath protection
- Easy locking stainless steel bail

Performance Metrics

1 High

Mechanical Resistance
