

Self-Contained Breathing Apparatus with Twin Cylinders

This self-contained breathing apparatus (SCBA) provides breathable air in hazardous environments. The unit features twin high-pressure cylinders, a pressure regulator, a full-face mask, and a harness system.

Overview

Professional Safety Solution

This Self-Contained Breathing Apparatus (SCBA) is engineered to provide reliable, breathable air in hazardous environments. Featuring a dual-cylinder configuration, it ensures an extended air supply for demanding operations. The ergonomic harness and high-clarity full-face mask are designed for comfort and safety, making this unit an essential tool for firefighting and industrial safety applications.

Technical Specifications

Inflation Pressure

30 MPa

Inflation Pressure

Cylinder Setup	Twin high-pressure cylinders
Material	Lightweight composite

Features

Key Features

- Ergonomic harness system
- Full-face mask with clear field of vision
- Consistent airflow regulation
- Secure and comfortable fit

Applications

Suitable Environments	Firefighting, Industrial Safety, Hazardous Environments
